

CAMERAS

How many different types of speed cameras are there?

Try to guess:

1. The name
2. The function of each camera
3. Is it forward/rear facing?
4. Can you see a visible flash?
5. Does it have an ANPR built in?

Can you name any of these?
If so how many?

Try with friends and let us know
how many you get.

CAMERAS

M25 "hidden" Cameras that have caught a few motorists out!

Many of these speed cameras now have the Automatic Number Plate Recognition (ANPR).

What can the ANRP camera used for?

The older cameras that used film could flash but did not record when the film ran out. Now, with technology being continuously improved, the cameras are digital and therefore do not need film in order to record the image.
